FOR IMMEDIATE RELEASE

INSPIRED FLIGHT ANNOUNCES THE ALL NEW IF1200A "The IF1200A: Category-Leading In Flight Time & Payload Capacity"

Inspired Flight Technologies, Inc., - A San Luis Obispo, CA, manufacturer of commercial sUAS (small Unmanned Aerial Systems) for Government & Commercial Customers is excited to announce its latest product launch of the IF1200A.

The IF1200A builds on the successes of its predecessor, the Blue UAS-accepted IF1200, by delivering a category-leading 85% increase in flight time. The IF1200A elevates the user experience of Inspired Flight's systems and further streamlines the workflows of operators in the field. Recently unveiled with much anticipation during AUVSI's (Association for Unmanned Vehicle Systems International) Xponential 2022 Expo in Orlando, FL; the IF1200A is a major leap forward for the heavy-lift electric UAV market.

Designed for the same customer base as the IF1200, the IF1200A enables massive increases in overall operational efficiency and cost-savings over the 5+ year projected lifetime of the aircraft. This aircraft is able to achieve 85% longer flight times with a larger battery, more capable motors, ESCs, and larger propellers. This version incorporates the Blue Cube flight controller running ArduPilot software.

Inspired Flight manufactures sUAS ready to tackle complex and high-value commercial and government applications. The company's focus on mission-critical verticals means its technology is used in life-saving and mission-critical ecosystems, across North America. With customers spanning the power utilities, infrastructure, first responder, and government space, Inspired Flight is emerging as a leading American provider of sUAS technology.

Conserving resources, creating jobs, and saving lives by leading the American small unmanned aerial systems ("sUAS") Industry.
